DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 90–139 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 of U.S. Patent No. 6335044 taken together with Blanchard et al (U.S. Patent No. 5143740) and either one of DE 3542075 or Witte.

The claims stand rejected for the reasons set forth in the last Office Action and in view of the following. The instant claims now further call for the comminution of the seeds being carried out by a cooled flocculating roller so as to maintain the seeds during comminution at a temperature below a temperature at which denaturation of the seed occurs. However, the claims of U.S. Patent No. 6335044 include this limitation in that the rollers form the flakes at a temperature lower than the denaturation temperature from the proteins therein (see claim 5). The instant limitation that these rollers be cooled flocculated rollers has already been addressed in view of the rejection set forth in the last Office Action.

Response to Arguments

2. Applicant's arguments have been considered and are addressed in the rejection set forth above.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action in view of the significantly altered claim language, particularly newly recited limitations regarding the packaging arrangement and order of opening same. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
